

# Fight **CANCER** with **ATH**

Come learn about **biostatistics** at the

## **UMN Biostat Open House**

Friday, October 17, 2014, 10-2:30  
University of Minnesota - Twin Cities

The Division of Biostatistics at the University of Minnesota is one of the premier biostatistics units in the world, focusing on the critical statistical methods employed in biomedical research.

UMN biostatisticians develop new techniques for analyzing complex biomedical data, and collaborate with medical researchers on studies ranging from laboratory experiments describing the inner workings of cancer cells to international trials testing new treatments for HIV and tuberculosis.

The Division encourages applications for graduate study (MPH/MS/PhD) from students with strong quantitative skills who are interested in applying them to high-impact research in the biomedical sciences.

For more information, and to register,  
visit **[www.biostat.umn.edu](http://www.biostat.umn.edu)**  
(Deadline: October 14th)

Can't make it? The event will be live-streamed and archived for later viewing -- details at [www.biostat.umn.edu](http://www.biostat.umn.edu).  
Follow us on Twitter (@umnbiostat) or visit us on Facebook to find out more about UMN Biostat.
